

# WHERE YOUR BIG BANG CAN HAPPEN

## AT TLS WE ARE CONVINCED THAT

aggregating and enhancing competencies in the Life Sciences sector means **relying on different approaches** and perspectives, because the foundations of knowledge are ever broader and deeper.

## THEREFORE, WE WANT TO BE

the place where business incubation, scientific research and education develop spontaneously, and where conditions are laid for creating an innovative Life Sciences ecosystem.

For us innovation is creativity made real in all its complexity.

**Here we lay the grounds for the unexpected to come into being.**

## WE ARE GUIDED BY AN INTEGRATED MODEL

of **public and private partnerships** that stems from a shared strategic vision, where TLS acts as an innovation system facilitator in the sector.

Highly specialized expertise, new paradigms and instruments, technological platforms, the ability to attract talent and resources, cross-contamination between science and enterprise: these are the levers we use to foster dialogue.

## THE VALUE OF TLS LIES IN BEING

a **place where a new culture of innovation is created by**

- enabling the expression of talent and creativity, wherever they are to be found;
- being the focal point of a virtuous circle;
- welcoming change, to rise to new and demanding health challenges.

## WE DREAM OF BECOMING

the cultural point of reference in the world of science, research, and innovation.

In looking to the future, we commit to seizing all the opportunities that arise with the intent to guide the natural predisposition to change, acting as a cultural glue that can make sense of chaos.

**TO MAKE SURE THAT IN TLS THE “BIG BANG” OF A NEW ENTERPRISE, OF A RESEARCH PROJECT, OF AN INNOVATIVE IDEA CAN HAPPEN.**

*« Whenever a theory appears to you as the only possible one, take this as a sign that you have neither understood the theory nor the problem which it was intended to solve. »*

Karl Popper
